

INTELLIGENT SETTOP SERVICE

ACCESS, MANAGE AND CONTROL YOUR
INSTRUMENT VIA THE INTERNET.

MAIN FEATURES

- No SIM card or Router with static IP required
- Custom URL
- Ntrip caster service
- Port mapping for monitoring projects
- Customized services

Settop IST Connect is a cloud service that allows you to control your surveying instrument via the Internet.

Whenever you start up a communication monitoring project it is always a difficult task. Getting the information from the field to your office in an accurate and timely way requires a high level of expertise in communications. Now there is no need to worry about having a static IP, complicated communication settings or complex contracts with cell phone providers. Settop IST Connect will do all of this for you in an efficient and easy to use way.
